Since 1925.

LEAKTITE

More Than 50 Years Of In

Welcome to Leaktite Corporation

Our reputation for product excellence is based upon true innovation in product design. Since 1925, Leaktite Corporation has achieved solid growth based on experience and flexibility to move with the times. Our reputation has been built on quality, service, and our ability to serve the needs of our customers and the evolving marketplace. Generations of consumers have come to rely on Leaktite products for professional and household use.

From the very beginning, Leaktite has realized that we are more than a supplier of product. We are part of a fast-paced and exciting industry that requires total involvement on many levels in order to be valuable partners with our consumers. We are constantly making improvements to our product lines to incorporate features and benefits that make Leaktite products the best and most trusted in the market. Our vision of the future demands that we remain sharp and respond to the needs of our customers and marketplace.

We're proud of our longstanding reputation for designing and manufacturing products that show excellence in every detail. Our philosophy is simple...make a great product and people will want to buy it. Over the past 85 years this basic tenet has proven true.

Leaktite products are proudly made in America...and are 100% guaranteed.

Thank you,

Rodney G. Sparrow

President

Leaktite Green 6

Paper tubs and pre-measured containers for a multitude of uses.

1 - 5 Gallon Buckets & Lids, In-A-Pail Accessories 18

A variety of buckets and accessories to complement the Leaktite product line.

LEAKTITE

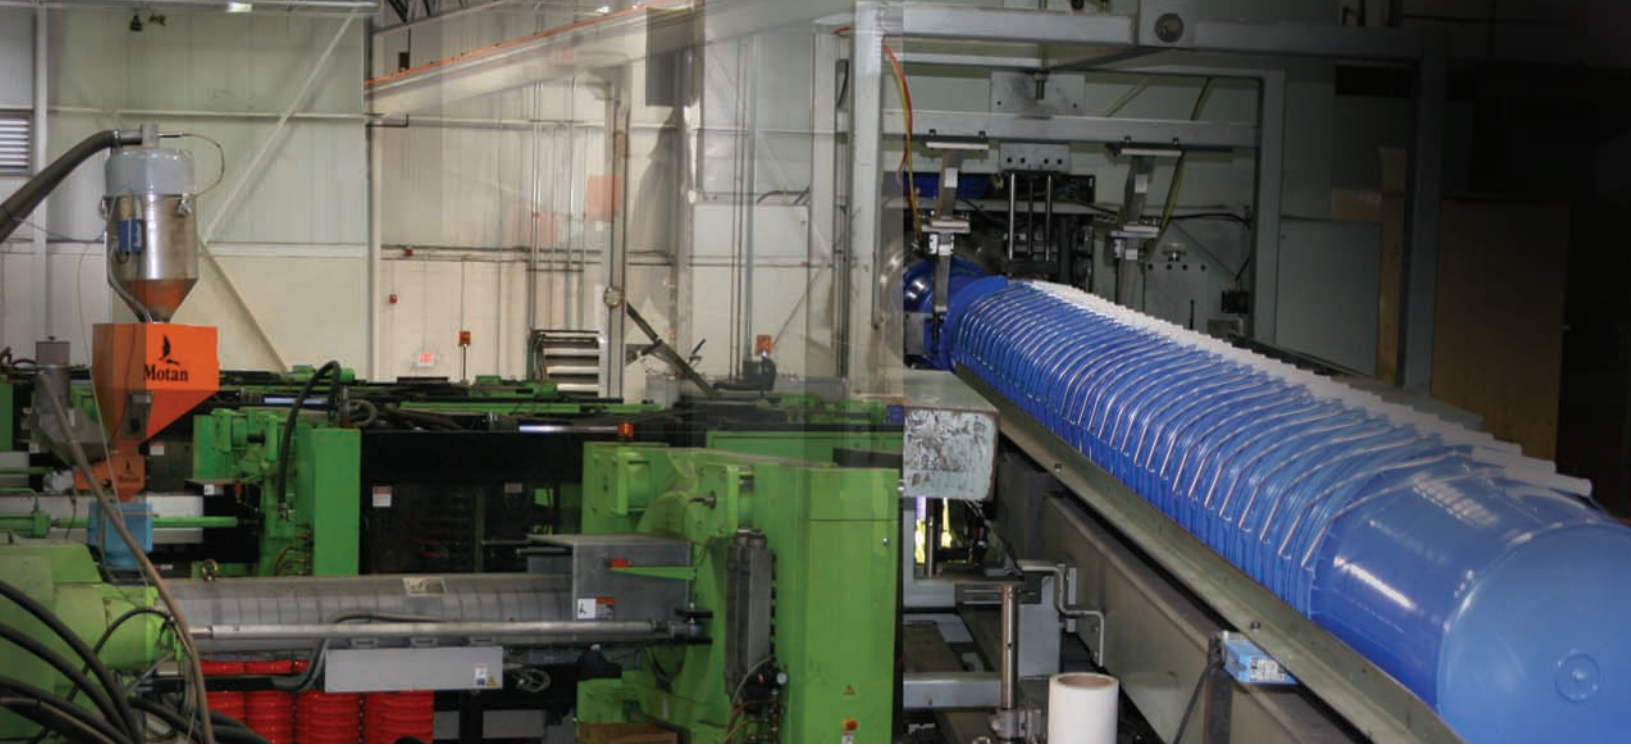

Sound manufacturing techniques, smart raw material management, and skilled labor allows Leaktite to be competitive in the many markets we serve.

Our metal forming, injection molding and thermoforming equipment has kept pace with the changing technology of plastics manufacturing in order to provide the benefits of the latest in manufacturing techniques to our customers. With injection molding presses ranging in size from 400 ton to 1000 ton, Leaktite can remain competitive by minimizing cycle times and providing a cost effective manufacturing platform for larger items such as five gallon buckets.

Leaktite's experience in metal forming pails, since 1945, means that our metal products are among the best quality produced in the world. Subtle design and manufacturing advancements in our basic line of metal pails have proved to increase customer satisfaction and durability of the products over the years.

Our in-line thermoforming machinery is capable of running various gauges of materials to suit the many applications of our product line. As with injection molding, tool design and construction are critical to quality products. Leaktite's control procedures over the construction and maintenance of its dies and molds ensure the manufacture of the highest quality products time after time.

Leaktite implements quality assurance programs consistent with both specific customer requirements and industry standards that meet or exceed our customers' expectations, while providing a safe and healthy working environment for our employees.

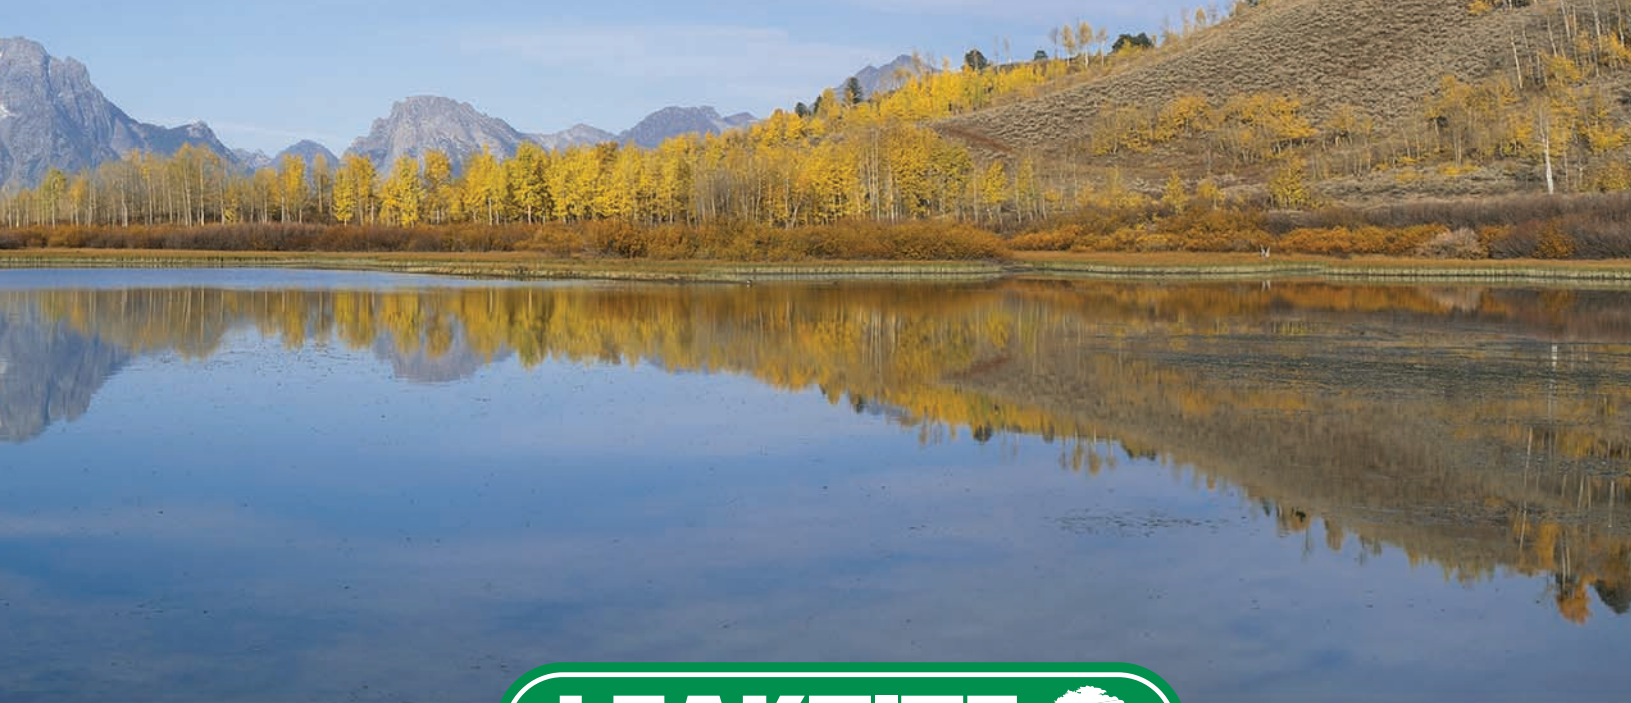

Leaktite's commitment to the environment has been evident right from the start. The use of recycled materials for manufacturing and the design of products that can be recycled have always been a priority.

Over the years the movement toward sustainability and environmental responsibility has caught on across the world and across the nation. We're proud to have been in the forefront of this movement and continue our philosophy of creating products that are both useful and re-usable.

The challenges to our environment both presently and in the future will continue to grow. Be assured that Leaktite will have a leadership position in our industry to take on these challenges and produce responsible products that meet the needs of our customers and those of our planet.

LEAKTITE

GREEN

the smart choice for the environment...

In response to a growing consumer demand for reassurance of the responsible nature of many products, Leaktite has introduced “Leaktite Green.”

This product line consists of a variety of our most popular trays, pails, and buckets that are manufactured with sustainability in mind for today’s environmentally conscious consumer.

“Leaktite Green” is another example of how we meet changing market conditions while providing products that represent a smart choice for the environment.

Work Some Magic Of Your Own...

Turn Our Famous 5 Gallon Bucket Into A Brand Impression Your Customers Will Carry Home With Them!

Who would have thought the humble five gallon bucket would become a giant in marketing a brand message?

We did! That's why Leaktite has, over the years, invested in printing capabilities that satisfy the creative requirements of the many customers who are taking advantage of this revolution in branding.

Leaktite offers custom offset printing on our line of plastic pails and buckets. With printing up to four colors, you can design a look that is perfect for promotional programs that require a custom design or logo.

A branded bucket is an excellent way to bring your private label product to market.

Can we help develop a successful bucket branding marketing program for you? Call us today and see how easy it can be.
